TO:

Honorable Mayor and City Council

FROM:

Michael C. McHatten, City Administrator

DATE:

July 21, 2015

RE:

Fiscal Year 2015/2016 Annual Budget

INTRODUCTION

I am pleased to present you my recommended operating and capital budget for fiscal year 2015-2016(FY15/16). Within this document you will find an executive summary, containing information on all estimated revenue and proposed expenditures for the year, as well as detailed information on major operating costs and capital projects. This budget provides a complete, comprehensive picture of the City's current and expected financial condition so that Council can focus on the necessary details to make the most informed policy decisions possible.

The responsibility for and preparation of the budget is set forth in Section 2.08.060 of the City of Angels Municipal Code, in which it states "It shall be the duty of the city administrator to prepare and submit the proposed annual budget to the city council. The city administrator shall also propose an annual salary plan to the city council." This section of the Code addresses the basic need to provide financial information. While this is certainly the primary purpose of any budgetary document, it is also necessary that the budget document accurately portray staff's best efforts at translating the priorities of the City Council, as such priorities have been expressed in Council's goal-setting evaluation of the City Administrator and previous actions of the Council.

I would recognize all City staff for their level of professionalism and excellence, providing ongoing assistance in compiling for the City Council this proposed FY15/16 budget. The budget establishes the "Essential Services" level of operating performance required by the City Council and the laws of our Federal and State governments. "Essential Services" are defined as those services necessary for the health, safety and desired quality of life to the community, and for the effective functioning of city government. Upon adoption by the City Council, the FY15/16 budget comprises all anticipated revenues and expenditures available to the City and necessary to maintain existing services and carry out most of the priorities of the City Council over the course of the annual budget period.

Through the process of preparing the FY15/16 proposed annual budget, Finance and Administration staff and City Department Heads have concentrated their efforts on providing the City Council with budget information that is timely and relevant to the Council's task of making policy decisions regarding services and programs. Staff analysis, review and discussions on budget constraints and service issues have taken place prior to formulation of the proposed budget. As is always true, when available resources are limited, many department requests cannot be

recommended. As in the past, the City Department Heads have been given the opportunity to influence the final recommendations contained in the proposed budget.

The proposed FY15/16 annual budget has been developed using the following principles:

- Basic services are financed at conservative levels;
- Revenues have been estimated at realistic levels, based on historical data and a reasonable forecast of economic conditions over the next year and the latest legislative developments;
- Reserve policies afford protection against unanticipated revenue shortfalls or necessary expenditures are in place;
- Productivity improvements through technology and human resources are employed in all City services;
- One-time monies have not been used for recurring expenditures;
- All applicable revenues have been computed consistent with the provisions of Proposition 218:
- The City of Angels quality of life is maintained and/or enhanced through a broad mix of services financed and paid for by its users;
- These spending plans reflect our commitment to provide a high level of service to our residents, while preserving our organization's long-term financial viability.

As the City continues to manage through a protracted economic downturn, we continue to see positive signs in the local economy in slow but steady improvements from the previous fiscal years. Angels Camp is pleased to have had continued increases in sales tax revenue and transient occupancy tax (TOT). Finally property tax has begun to turn the corner with a County-wide increase in assessed valuation. While, overall the economy remains on a slow but steady growth trend, we have yet to recover from our revenue peaks that we witnessed on FY08/09 (prior to the recession). We enter the next budget period much like the previous, challenged with CalPERS retirement and healthcare cost increases as well as increases in Workers' Compensation and Liability Insurance costs. It is under these conditions that fiscal prudence requires that we not undertake additional ongoing commitment beyond those identified and recommended in our expenditure forecast.

For the most part, the proposed budget continues to be a "hold the line" budget that addresses core services with defined performance measures that maintain the levels of service our residents have come to expect. The "exceptions" to holding the line are presented later in this discussion and are provided to ensure that we hold the line both now and in the future as well as provide enhanced levels of service where warranted. The result of the proposed budget is a spending plan that meets the need of our community without compromising our financial future. Any budget comes with risk and risk is always an element in these historic economic times. This risk is constantly compounded by occurrences on the State Level. However, I am confident that the proposed budget is a responsible one.

BUDGET APPROACH

I have always viewed the budget plan (plan) as a collaborative process. That process is a blending of staff input, management buy-in and administrative support. The last piece of collaboration is the community process through Public Review and Council scrutiny. In terms of the plan before you, some guiding principles were presented to staff and our community partners and the following broad policy priorities are reflected throughout the recommended budget:

- Prudent Fiscal Management
- Customer Satisfaction
- Employee Satisfaction
- Community Building
- Enhancing Current Services
- Preserving our Natural Environment
- Total Planning
- Economic Development
- Leadership and Image

Since my arrival, the City Council indicated that they would like additional information but most importantly timely information with regards to budget reporting. With current staff stability, quarterly budget reports are the norm of our standard operating procedure so that the Council and Community have updates on our fiscal health as well as our ability to provide service delivery to the community. The FY15/16 budget builds upon previous budget presentations, so that the format and content provides the City Council a useful tool in making budget decisions.

As part of our strategic budget approach, City departments undertook an analysis of the services they provide as it relates to costs. This information is included in the budget and presented as Performance Measures. It is from a Performance Measure perspective that department directors, and community partners prepared their work plans for the next fiscal year. With the data collected since Performance Measures were introduced, the Council and Community now have better indicators as to how our valuable resources are spent. The proposed budget is based on resources needed to achieve the desired performance outcomes.

Throughout the past, the Council has been provided a number of updates on the City's financial condition. Whether it was through the quarterly budget presentations and/or the presentation of the annual audit, the Council has heard time and again that the City is in a good financial situation. However, at the same time, the Council has heard about the needs of our aging infrastructure and most importantly the current and future needs of Water, Wastewater and our Transportation systems. The capital needs that exists today far exceed available resources. Between the Wastewater Master Plan and Water Master Plan, the Council has heard of the needs of our systems and the budget reflects taking on

those needs. Whether it be through Capital Projects, advanced financial planning through a comprehensive rate study or continued grant submissions, the City will be in a much stronger position to protect our most precious resources both now and in the future as a result of this year's work product.

THE FISCAL SITUATION IN ANGELS CAMP

According to an article written by Robin Respaut, "Cities in California as a whole are largely recovering from the recession but not all with the same vigor. Urban coastal regions have enjoyed job and economic growth more than inland and rural counterparts, according to a new report by Standard & Poor's Ratings Services.

A disproportionately large share of California cities have received S&P's highest ratings compared with the rest of the country, thanks to the Golden State's strong economy and higher income and wealth levels. But the health of California's cities diverges, with more cities at the top of the rating spectrum than the national average but also more distressed cities toward the bottom compared with other states. Cities in the Central Valley, the far north, and the Inland Empire "may continue to face challenges as they seek to balance spending pressure with slower revenue growth.

The impact has been uneven. In Los Angeles County, for example, revenue hit its pre-recession peak, while Sonoma County's tourism and agriculture sales tax base had not yet fully recovered by the end of last year. San Bernardino has just returned to where it was in 2007, S&P reported. The rating agency noticed that some cities were still cutting their budgets to adjust to slower revenue growth in the wake of the recession. But in an effort to be fiscally conservative during lean times, many cities have deferred spending on capital projects. That may increase budgetary flexibility in the short run but may constrain it over time as projects grow urgent, S&P warned."

So while the nations recession may be over in terms of gross domestic product and retail sales, it is lingering if you looked at unemployment, lending and borrowing from banks and revenues of the State and government. The end of the recession does not necessarily mean recovery but there is hope. Angels Camp's economy and position as a destination will help lead to further recovery. In addition, we have a local government that is strongly involved and skilled at economic development and we have great business-government relationships. Angels Camp and our community partners should work together on creating better tools for economic development in order to help our recovery both now and into the future.

For the FY 15/16 budget, staff entered the process somewhat optimistic since sales tax revenues and transient occupancy tax (TOT) have shown signs of improvement over the past two years. In addition for the second consecutive year, property tax has begun to increase. In the FY 15/16 budget, staff continued to hold the line and be extra conscientious of expenditures. In spite of conservative spending and continued monitoring of all revenues and expenditures, the FY 15/16 has a slight General Fund structural deficit of \$30,499. It should be noted that there are a number of "one-time" projects included in the proposed budget that are one-time costs which essentially

creates a balanced budget. However, the City Council, staff and our community partners will have to continue to work on plugging the structural deficit gaps in the future as the cost of doing business continues to climb faster than revenue via economic recovery and we must do so with weighing essential services versus Community Support programs (currently Community Support items are not included in the base budget). They will be considered as additional.

Because funding is still limited, this year's General Fund budget expenditures include minimal Capital Outlay and most of these are not part of the base budget but are categorized as additional requests. In addition, other items necessary to maintain computer systems are for the most part included as Base Budget items. Unlike last year, we have moved all Community Support items to Additional Requests. The City is not in the position to fund Community Support items long-term without significant increases in revenue so the recommendation is to consider Community Support on a year-to-year basis.

This year's Base budget as presented also reflects certain assumptions. Major revenues were projected to increase by 3% from FY14/15. This is based on state projections, as well as actual receipts through the third quarter of 2015. However, in spite of the good news, the base budget reflects projected increases in health insurance, including medical, dental and vision as well as increases in PERS retirement, workers compensation insurance and liability insurance. So while the economy is showing positive signs and turning the corner it is not keeping up with rising costs of doing business.

The FY15/16 Budget, therefore, employs conservative assumption of growth that reflect a *cautiously optimist* outlook. The budget assumes that conditions will not decline moving forward. Instead, the budget assumes marginal increases in economic activity during this period. In addition, the budget conforms to national expectations that the recovery will be gradual but we should continue to look to solutions in fixing the structural deficit now and in the future.

RATES AND USER FEES

Given the current economic climate, the budget as submitted strives to limit the financial burden placed on our residents. The FY15/16 budget assumes no increases to water and wastewater rates. However, the completion of a comprehensive water and wastewater study is an important first step in planning our short-term and long range future for our enterprise systems. While it is too early to project the outcome of the rate study, it is important to note that any rate study must take into account the needs of the infrastructure, the needs related to growth, the costs to operate and the impact to the rate payer. In addition, the rate study needs to consider the dramatic effect drought years has on our water provider and the viability of UWPA to continue to provide water now and in the future.

The City regularly evaluates its user charge system (user fees) to ensure that we are assessing appropriate fees for the services we provide. For FY15/16, there is no proposed fee increases recommended that are tied to budget adoption. The lone exception is the recommended increase in Museum fees. Staff believes that the City Council should be aware of these user fees as it relates to actual costs and a workshop on this will be presented in the future. Meanwhile, staff is in the process of reviewing business license fees as well as impact fees for water/wastewater, streets, parks, police and fire. When the next wave of growth occurs the impact fees should be reflective of the cost today and not ten years ago.

COST ALLOCATION/INTERNAL SERVICE FUND

Cost Allocation and/or Internal service funds are used for operations serving other funds or departments within a government on a cost-reimbursement basis. The City of Angels allocates a formula and/or percentage of its time, material and supplies to many different funds or programs, such as; general fund, water fund, wastewater fund, road fund, the landscape and lighting district, capital projects and certain grant funds. The purpose of the cost allocation plan is to allocate for the cost associated with activity that took place within the various funds. As an example, staff working on accounts payable, accounts receivable and payroll, track their time spent on work activities associated with the various funds and programs and the City reimburses the Finance Department from the various funds to make them whole. This tracking on the budget comes under the heading as Transfer In/Out.

Historically, the City has focused mostly on labor expense but did not include all other operating expenses as part of the cost allocation program. While this method may save one fund it is at the expense of another fund and does not represent "the true cost of services provided". Using the same example from above, the Finance Department would not only be reimbursed for their time but would be reimbursed for all other operating costs (such as office supplies, utility costs and equipment leases) using the same formula/percentage. This historical trend was adjusted with the adoption of the FY13/14 and the FY15/16 budget reflects an additional "truing up" of that allocation. Staff will continue and monitor the budget allocation and adjust as necessary.

GENERAL FUND

The General Fund is the main operating fund for the City and it is the least restrictive of all funding sources. Currently, the General Fund is very healthy. The audited General Fund balance for assigned and unassigned funds (including the designation of \$275,769 for post employment benefits) for the end of June 30, 2014 was just over \$1.48 million. For FY14/15 City Council approved a budget with a \$242,000 General Fund operating loss. This would have placed the ending General Fund balance for FY14/15 for assigned and unassigned funds (including the designation of \$275,769 for post employment benefits) in the \$1.24 million range.

Meanwhile, included in the base budget the City continues to meet their obligations for existing retirees on a "pay as you go" basis. It is also important to note that decisions to fund the OPEB obligation are pending but the Council needs to consider that funding with the current designation amount should include offset contributions from Water and Wastewater based on the employee allocation plan.

While we don't have a defined fund balance policy, typical standards for the General Fund is to maintain cash reserves between 20-25% of your operating revenue. With that said, maintaining a consistent General Fund Balance of \$500,000 and above places the City in an excellent financial position.

Current economic conditions have called upon local government to work even harder at living within our means. This past Fiscal Year has been indicative that the City of Angels is up to the task. As mentioned early in the budget message, for the most part, the recommended budget is a "hold the line" budget that addresses core services with defined performance measures that maintains the levels of service our residents have come to expect. Holding the line is also referred to as the "base budget" and serves as our beginning recommendation.

As stated earlier the base budget does indicate a general fund operating loss of \$30,499. However, Community Support is not included as part of the base budget. If we are to maintain a balanced budget while providing Community Support we must work collectively on fixing the structural deficit.

The "exceptions" to holding the line are presented as Additional Budget Requests. I have prioritized these requests based on several factors including but not limited to: service delivery, succession planning, operational efficiency, operational coverage, capital requirements and community outreach. Items listed under Community Support do not reflect a prioritization, however the City Council should consider these funding requests in light of our essential service needs. Many of the requests are "one-time" allocations which do not increase our structural deficit while some of the requests (especially those that are staff related) will commit the City to funding these items in the future.

Many of the requests listed include capital replacement of vehicles and equipment. The budget reflects the replacement cost, however if approved staff could look at a lease purchase for these items that would soften the direct hit to fund balance in the current fiscal year.

WATER AND WASTEWATER FUNDS

The Wastewater Fund and Water Fund remain relatively healthy. Both Water and Wastewater have current short term and long term infrastructure needs that far exceed available resources. Pursuant to the Wastewater Master Plan, there exists over \$11.3

million in short-term and long-term capital needs. After the proper recording of the loan from the Water Fund to the Wastewater Funds and after the completion of the Sprayfield improvements the estimated year end fund balance for Wastewater is \$1.31 million.

Meanwhile, based on the Water Master Plan there are \$24.3 million in current and future capital needs against and estimated year end fund balance of \$6.37 million. While not written into policy, it is recommended that enterprise funds (such as water and wastewater) maintain six (6) months of operating capital (Cash+Receivable-Payables). This is especially important for maintenance of bond ratings and is absolutely required in order to issue bonds for capital improvement projects. The proposed budget maintains a strong reserve position if both funds net reserve are taken into consideration which maintains a net \$7.68 million in reserves.

As mentioned earlier in the report, the Council has heard about the needs of our aging infrastructure and most importantly the current and future needs of water and wastewater. The capital needs that exist today far exceed available resources. The completion of the Water/Wastewater Impact Fee Study as well as the completion of Water/Wastewater Rate Study will go a long way in developing a comprehensive plan to deal with current infrastructure needs and required growth components as well as the placement of those burdens in an equitable fashion on current rate payers versus future development.

Finally, this is the last year of the of the Wastewater 2001A Revenue Bond, which should signify increases in Fund Balance in the Future. However, this is negated somewhat by current and future capital needs. Meanwhile, the continued drought has a profound effect on UWPA and finding short-term and long term solutions to this variable will be explored through rates and impacts fees.

CAPITAL PROJECTS

There are currently proposed a number of capital projects for next fiscal year. All totaled over \$2.613 million is designated as next year's capital project plan. The projects include the following:

Streets/Roads

Downtown Corridor Collector Road Project (Stripping and Safety Signage) Angels Creek Trail Gateway Corridor Plan Murphys Grade Road

Community Development Block Grant (CDBG)

CDBG Park Projects

CDBG Firehouse Project

Water Improvements

Water Impact Fee Study Design Water Treatment Plant Improvements UWPA Contract

Water Replacements

Murphy's Grade Road Water Line Bragg Street Water Line Replace Water Meters Water Rate Study Paint/Prime Pressure Filters

Wastewater Improvements

Wastewater Impact Fee Study Aerated Digester

Wastewater Replacements

Murphy's Grade Road Sewer North Baker Street Sewer Main Water Interfund Debt Payment SCADA Upgrade Wastewater Rate Study Sanitary Sewer Management Plan

Council should note that with the conclusion of the Water/Wastewater Impact Fee Studies, staff will begin packaging a Five-Year Capital Improvement Plan for your approval. Capital projects almost never fit neatly within the confines of a single fiscal year. With that said, it is important to have a useful planning tool for forecasting capital projects. A Five-Year Plan once approved, would be amended every year in order to reflect revenue availability, change in construction costs, availability of grant funds and priorities based on growth and development. Finally, staff is focusing efforts on analyzing the TOT, Roads, Transportation Impact and Gas Tax Funds prior to recommending a defined street project as these funds could be critical in future grant applications as available matches.

IMPACT FEES

Development Impact Fees, which are considered to be a charge on new development to help fund and pay for the construction or needed expansion of offsite capital improvements have not been adjusted since 2003. These fees are usually implemented to help reduce and mitigate the economic burden on local jurisdictions that are trying to deal with population growth within the area. As an example, the City has four major impact

fees: Police, Fire, Parks and Streets. These funds will now be recognized in a stand-alone section of the budget, as opposed to recognizing them in the operating budget. Staff is in the process of receiving proposals for the Impact Fee Study which is included in the base budget.

EXPENDITURE BUDGETS

As mentioned early in the report, For the most part, the base budget is a "hold the line" budget that addresses core services with defined performance measures that maintain the levels of service our residents have come to expect. The base expenditure budget (specifically maintenance and operation expense) has very little change from last year. Some correcting of line items has occurred, but each department was challenged with maintaining core levels of service.

Other changes that are evident throughout the base budget and are included as part of the line item details are cost of living increase. These include the following and are budgeted by Department and Fund:

Personnel Increase (merit)/promotions: +\$139,000 (62% at top step)

Minimum Wage/Paid Sick PT: +\$11,000 PERS Increases: +\$14,000 Health Benefit Increases: +\$36,000

Workers Compensation: +\$20,000 (retroactive adjustment)
Liability Insurance: +\$10,000 (retroactive adjustment)

Finally, positions/promotions that were approved in the last Fiscal Year Budget are fully funded in the current Fiscal Year.

PERFORMANCE MEASURES

Performance Measures are once again provided as part of the budget. These in large part reflect the core services that the City of Angels provides to our community. Measuring performance is critical to delivering the results that matter most to Angels Camp residents. Staff will begin to initiate public reporting on key Performance Measures this fiscal year. This information will be seen on our website in a visual format that tracks results by City Department. These indicators will provide information on how quickly we respond to emergency calls, how clean our public spaces are and other crucial indicators of Angels Camp's quality of life and standard of living. Accountability and transparency are the cornerstones of cost-effective local government services.

MASTER FEE SCHEDULE

The FY12/13 budget included the adoption of a Master Fee Schedule. Fees for service are reviewed on an annual basis and several recommendations for additional fees and or changes to the fee structure are included for your consideration. The Master Fee Schedule, once approved, becomes a "one-stop shop" for anyone wanting to look up what our various service fees and user charges are. As stated earlier in this report, the City

regularly evaluates its user charge system (user fees) to ensure that we are assessing appropriate fees for the services we provide. For FY15/16 the only current recommendations for fee increases are for the Museum. As mentioned earlier, staff believes that the City Council should be aware of these user fees as it relates to actual costs and a workshop on this will be presented in the future which will include recommended increases.

ADDITIONAL BUDGET REQUESTS

There are twenty one (21) additional budget requests. I have highlighted those items that I feel have the greatest effect on core service delivery including: succession planning. operational efficiency, operational coverage, public safety, capital requirements and community outreach. I also feel strongly that the best way of "growing" out of the structural deficit is through improved economic development. Therefore I view the Community Support requests as critical in helping the City of Angels actually close our structural deficient through development, job creation, job retention and increased tourism. All totaled, if all the additional request items were approved the fund balances would reduce by these additional amounts:

General Fund:

\$226,232

TOT Roads:

\$14.191

Water Fund:

\$78,245

Wastewater Fund: \$184,252

CONCLUSION/RECOMMENDATION

In summary, the proposed base budget is once again best described as cautiously optimistic. We have managed through the worst of the Great Recession and our revenues have stabilized and are now heading in the right direction, but the economy is still fragile and this is no time to be adding new programs and services over the defined recommendations. I believe this budget underscores a commitment by all City departments to live within their means and to implement cost-saving efficiencies wherever possible, while preserving those things that make Angels Camp a great place to Live, Work and Play.

Additionally, the base budget defines Angels Camp as a city that can balance prudent fiscal management, enhanced customer services and satisfaction while fostering a workplace where employees are satisfied. The base budget reflects our commitment to building community through preservation of our natural environment while creating an enhanced focus on sustainable economic development.

During, this Fiscal Year, I believe that the following steps should be undertaken. We should continue to look to more efficient ways to operate. We should look at City owned properties and consider selling and/or consolidating these properties in order to provide more efficient and effective services to our community. We should engage the labor

organizations in an effort to find sustainable solutions for retiree medical costs and health benefits. We should take a hard look at "fees for services" and be prepared to make tough choices as it relates to those fees that are currently being subsidized and subsequently unsustainable. We should continue to partner with Destination Angels Camp, the Angels Camp Business Association and the Calaveras Visitors Bureau in developing marketing and economic strategies that bring sustainable change in tourism, business expansion, job creation and retention that ultimately builds our property, sales and tourism tax base. To that end, the City Council, City Staff and our community partners should be prepared to roll up our sleeves to study our services and finances and advise on how best to create a sustainable future so that our City will always be a Great Place to Live Work and Play.

Staff recommends that the City Council review the attached documentation and prepare questions for the upcoming Budget Workshop. At the Workshop staff will provide a presentation of the FY15/16 Annual Budget for the City of Angels.

Upon completion of the workshop, staff would ask the City Council to set a Public Hearing for the subsequent consideration of adoption of the associated budget resolutions pending recommendations of the City Council as a result of the workshop.

The budget presented for Council's consideration remains in all material respects a status quo service delivery budget. As such it represents the City Administrator's view that we are finally beginning to turn the corner and can begin, incrementally, to address the issues described in the preceding paragraphs.

I wish to thank the City Council for their guidance and support throughout this past year. In addition, I wish to thank the management team, budget development staff, our community partners and all of the employees of the City. It is through the employee's daily dedication, creativity and sacrifice that have helped make the FY15/16 budget a reality and something we can all be proud of. Staff recommends approval as presented.

Respectfully submitted,

Michael C. McHatten City Administrator
